

Scandinavian Conference on Health Informatics

Gothenburg, Sweden, April 6-7 2016

The Scandinavian Conference on Health Informatics 2016 is organized together with the national health informatics organisations in Denmark, Norway, and Sweden and this year also the **Vitalis conference**. The goal of the conference is to stimulate scientific discussion of health informatics issues in the Scandinavian countries. The target audience of the conference are people doing, or having an interest in, health informatics research in a wide sense, including any development, implementation, evaluation, or teaching of information technology and/or management in the health sector.

The conference takes place at **Svenska Mässan** in the city of Gothenburg, close to the city center and hotels.
